

facultyName	Research Area
<b>Nanjing University of Science and Technolo</b>	
Mail sent	Jianliang Li A.Scientific Computing & Software (Numerical Analysis, Simulation, Optimization) B. Data Analysis (Bioinformatics, Data mining, Neural Networks, Genetic Algorithm) C.Signal Processing (Audio & Video Processing)

## University of Science and Technology of Chi

mail send	Qiao Chunming	Wireless mobile network and optical network, Internet technology and information traffic convergence system Data Mining, Big Data, Artificial Intelligence, Machine Learning
mail sent mailsent	Xiong Hui Yao new	Evolutionary Computation, Machine Learning Machine learning, data mining, computational intelligence, underground pipe network detection and data fusion, evolutionary computation
mail send	Huan Huan	intelligent formal modeling and multi-robot system of key technologies
mail sent	Chen Xiaoping	program verification, concurrency theory, programming language theory
mail sent	Feng Xinyu	Network Program Parallelization on Multi-core Processors, Computer The internet.
mail sent	Hua Bei(female)	database system and its application, information integration, real-time database
mail seent mail sent	Yue Lihua Zhang Lan(female)	mobile computing, privacy protection, big data. Compile and decompile, program understanding and analysis of the support environment, intelligent information processing.
mail sent	Chen Kai-ming	Wireless networks (wireless ad hoc networks, wireless sensor networks, wireless car networks, UAV networks, mobile interconnection networks, body domain networks, etc.), smart grids, data center networks, big data analytics based on deep learning, and more wireless network; group-based perception; passive sensing and networking; wireless radio imaging
mail sent	Zhang Xinming	Big data mining and bioinformatics applications, multi-core parallel programming model and performance optimization.
mail sent	Yang Panlong	storage systems, data processing, high performance computing
mail send	Xu Yun	
mail sent	Xu Yin Long	

mail sent	Xiong flame	computer network and information security, mobile computing and mobile networks, distributed processing Massive data processing, data indexing and storage technology, spatial database, indefinite database, data cleanup
mail sent	Xie Xi Branch	
mail sent	Tang Ke	Computational Intelligence, Evolutionary Computation, Machine Learning, Intelligent Optimization, Data Mining large-scale, real-time, high-availability distributed system (Large-scale, Real-time and Highly available Distributed systems)
mail sent	Li Cheng	Wireless Networks and Mobile Computing, Internet of Things, Internet Security, Data Privacy, Social Networks, Algorithmic Analysis Design
mail sent	Li Xiangyang	combination software technology, large-scale network system and distributed algorithm
mail sent	Li Jing	computer networks, protocols and software testing, information security
mail sent	Jiang Fan	big data, cloud computing, social networking, machine learning, network economics, wireless networks
mail sent	Han Kai	Theoretical Computer Science
mail sent	He Chao building	knowledge representation and reasoning, intelligent robot control
mail sent	Ji Jianmin	Software Analysis and Testing, Information Security.
mail sent	Zeng Fanping	Parallel compiler technology, high-performance multi-core computing software.
Mail Sent	Zheng Qilong	Mass data mining technology, small sample learning technology, computer modeling and simulation, information security, big data and cloud computing, quantum information processing
Mail Sent	Cheng Hao Ran	Programming language theory and implementation technology, especially parallel language design and compilation for new system architecture, parallel program analysis and verification, and real-time compiler-assisted garbage collection.
Mail Sent	Yang Wei	computer system structure, embedded system design, evolutionary computing, fault-tolerant computing, electronic design automation
mail sent	Zhang Yu(female)	Machine Learning, Data Mining.
mail sent	Zhang Junxia	collaborative communications, car networking and Software Defined Networking (SDN)
mail sent	Yuan Bo	
mail sent	Xu Linli	
mail sent	Xu Hongli	

		Theoretical research involves fields such as Internet of Things (IoT), the Internet, big data and cloud computing, financial / medical data mining, and group-based perceptual computing. Systems research involves UAVs, UAVs, IC design, operating systems, etc. field.
mail sent	Xing Kai	Mobile Social Networks, Delayed-tolerant Networks, Internet of Things, etc. .
mail sent	Xiao Mingjun	
mail sent	Jun-Min Wu	Virtualization Technology and Cloud Computing, Multicore Computer Systems and Applications, Computer System Simulation and Performance Optimization
mail sent	Wu Feng	multi-agent system, automatic planning theory, intelligent robot decision-making
mail sent	Wang Chao	deep learning processor, FPGA / GPU-based big data acceleration, high performance computing.
mail sent	Thomas way	Evolutionary Computation, Genetic Programming, Transportation Planning, Logistics, Large-Scale Optimization, Numerical Optimization, Data Mining, Service-Oriented Architectures (SOAs)
mail sent	Wang	wireless sensor networks, car networking, distributed systems
mail sent	Wang Xingfu	Sensor Networks and Security, Complex Systems Modeling, Embedded Systems
mail sent	Wanshou Hong(female)	computer image processing and understanding, remote sensing image processing, artificial intelligence and pattern recognition
mail sent	Wang on the fly(female)	Emotion Computing, Pattern Recognition and Data Mining Theory and Applications, Multimedia Computing
mail sent	Tano	future network technology, Internet big data, software-defined network, new media network
mail sent	Haisheng	data center network, cloud computing, wireless networks, algorithm design and analysis
mail sent	Song Peng	computer vision, computer graphics, human-computer interaction
mail sent	Luo Wenjian	machine learning and data mining, network and information security, computing intelligence and applications.
mail sent	Miao Fuyou	Network Information Security, Applied Cryptography, Mobile Computing, Distributed Wireless Network Routing, Public Key Management.
mail sent	Sun Guangzhong	High Performance Computing and Algorithm
mail sent	Qian Chao	Optimization, Big Data Processing and Applications.
mail sent	Liu Qi	evolutionary computing, machine learning, data mining
		data mining and knowledge discovery, machine learning methods and their applications

mail sent	Liu Hengchang	Internet of Things, big data, mobile cloud computing machine learning, intelligent information processing and mining, Internet information extraction and depth search and mining.
mail sent	Liu Guiquan	Mobile object database, spatio-temporal database, new storage-oriented database, Web information extraction and search.
mail sent	Jin Peiquan	program verification, concurrency theory, programming language theory
mail sent	Liang Hongjin(female)	computer storage systems, cloud storage, big data storage
mail sent	Li Yongkun	evolutionary computing theory, network, wireless communications
mail sent	Li Jinlong	information security, formal program verification, mobile computing
mail sent	Huang Wenchao	
mail sent	Huang Zhang Jin	Computer Graphics, Computer Aided (Geometric) Design, GPU Computing, Computer Vision, Scientific Visualization program verification, operating system kernel verification, concurrency theory, programming language theory
mail sent	Fu Ming	Parallel algorithms and software, deep learning algorithms and programming framework, big data parallel storage and processing, high performance computing, computer system performance evaluation.
mail sent	Han Ting	Scientific Computing Visualization, Computer Animation, Pattern Recognition, Images deal with wireless sensor networks, networking, networked vehicle, information hiding, secure multi quantum information security, mining data analysis large, large data privacy, Cloud security
mail sent	Dong Lanfang(female)	
mail sent	Huang Liu	Parallel Algorithms and Parallel Processing, Parallel Architecture, Communication Problems in Parallel and Distributed Computing, IP Multicast Research
mail sent	Gu Naijie	machine learning, data mining, social networks, personalized recommendation system.
mail sent	Chen Enhong	
mail sent	An Hong(female)	Large-scale Parallel Computer System Architecture, Big Data Parallel Storage and Processing System, Cognitive-oriented Reconfigurable Computing, Parallel Programming Environment and Tools, and High Performance Computing.
mail sent	Shao Zhong	Highly trusted software, programming language and compiler, operating system

**Nanjing University of Aeronautics and Astronautics(Cor**

Mail sent	CAO Zining-Mail Sent	Formal Methods 1.Software Analysis and Verification ; 2.Semantic Web,Service Oriented Computing 3.Cloud Computing
Mail sent	HUANG Zhiqiu-Mail Sent	Information security & privacy
Mail sent	HUANG Yuhua-Mail Sent	Spatial Data Mining and Machine Learning
Mail sent	HU Caiping	1.Pattern recognition; 2.Embedded system.
Mail sent	GAO Hang-Mail Sent	1.Machine Learning & Data Mining
Mail sent	FENG Aimin(female)-Mail Sent	2.System Configuration 1.Neural computing; 2.Pattern recognition;
Mail sent	DAI Qun(female)	3.Machine learning.
	CHEN Dan	1.Information hiding
Mail sent	(female)	2.Network security
		1.Computer network;
Mail sent	CHEN Bing-Mail Sent	2.Wireless network; 3.Network Security.

## Shanghai Jiao Tong University(Comp)

Mail sent	Deng Xiaotie Professor	Algorithms-agents-data Interface on Internet, Market, and Social Networks Laboratory Language Technology and Application including: Opinion Mining, Information Retrieval, Information Extraction, Machine Learning, Ontology Learning, Natural Language Generation
Mail sent	Yao Tianfang	<p>◊?Computational model for Perception and Cognition Learning and Memory in Cortical Networks, Visual Neural Representation and Coding, Visual Global Feature Analysis; Object Recognition, Multimodal Computational Model</p> <p>◊?Brain-Computer Interface and Brain Signal Processing Brain EEG Signal Processing, Evoked Potential Analysis and Localization, Brain-Computer System Design, EEG Pattern Recognition, EEG based Person authentication</p> <p>◊?Machine Learning and Inference Independent Component Analysis, Sparse Representation, Tensor Factorization and Analysis, Information Geometry</p>
Mail sent	Zhang Liqing	

Mail sent	Lu Bao-Liang	Brain-like computing, neural networks, machine learning, brain-computer interaction, affective computing
Mail sent	Xu Lei	Intelligent Human-Computer Interaction Machine Learning, Pattern Recognition, Computer Vision, Information Hiding, Complex Networks
Mail sent	Lu Hongtao	natural language processing, machine learning, data mining, bioinformatics and artificial intelligence
Mail sent	Zhao Hai	<ul style="list-style-type: none"> <li>1) use machine learning methods to solve the problems of natural language processing.</li> <li>2) focus on Internet-based information retrieval and extraction, such as hot topic/event detection and tracking, topic/event evolution, news event extraction and so on.</li> <li>3) apply database technologies for different applications.</li> </ul>
Mail sent	Li Fang(female)	Data intensive computing and Social Network
Mail sent	Deng Qianni(female)	<ul style="list-style-type: none"> <li>1. Computer architecture</li> <li>2. Energy efficient and resilient microprocessor architecture</li> <li>3. GPGPU and multicore architecture, parallel programming</li> <li>4. Software and hardware co-design for cloud and mobile computing</li> </ul>
Mail sent	Liang Xiaoyao	parallel distributed computing, wireless netwks, sens netwks, multimedia overlay netwks, intelligent traffic information systems, high perfmence computingbr pervasive and adaptive learning technologies.
Mail sent	Wu Minyou	<ul style="list-style-type: none"> <li>1. Image-based Modeling and Rendering, Animation, Image Processing, Natural Phenomenon Simulation/Non-photorealistic Rendering, GPU Processing,.</li> <li>2. Virtual Reality, Augmented Reality</li> </ul>
Mail sent	Shen Liping(female)	<ul style="list-style-type: none"> <li>3. Data Visualization and Biomedical Imaging</li> </ul>
Mail sent	Sheng Bin	Computer Application
Mail sent	Yu Yong	E-Learning Technologies; Knowledge Discovery and Data Mining; Data Encoding and Information
Mail sent	Shen Ruimin	CAD, computer graphics, computer animation, and image based graphical techniques such as rendering, reconstruction and modeling
Mail sent	Ma Lizhuang	Computer architecture security, software security, wireless network security
Mail sent	Zhang Yuanyuan(female)	Cryptography and Information Security
Mail sent	Liu Zhiqiang	Public key encryption, in particular of distributed network surrounding
Mail sent	Long Yu(female)	

		1. Security, Privacy and Trust in mobile networks (See the Project Description on CR security here) 2. Smart Phone System Security (See the Project Description on WiKi) 3. Cloud Computing Security 4. Applied Cryptography
Mail sent	Zhu Haojin	Information Theory (especially Shannon Channel Capacity and Network Coding), Coding Theory (especially Hamming Distance, Constant Composition and Constant Weight Code, Periodic Sequence) and Computer Security (especially Virtual Machine Security)
Mail sent	Luo Yuan	Cryptography and information security
Mail sent	Liu Shengli	
		- software security; - hardware and embedded security; - big data and cloud security with privacy; - financial security techniques.12:12
Mail sent	Gu Dawu	Network and Service Computing
Mail sent	Zhong Hao	Mobile Computing Big Data Social Networks
Mail sent	Xue Guangtao	Distributed Computing Vehicular Networks, Wireless Networks, Distributed and Parallel Systems and Mobile Computing
Mail sent	Hongzi Zhu	Wireless and mobile networks, sensor networks, wireless vehicular networks, mobile computing, and Internet of things.
Mail sent	Zhu Yanmin	Grid and Cloud Computing, Wireless Sensor Networks, VANET
Mail sent	Li Minglu	Software Methodology, Distributed Computing
Mail sent	Huang Linpeng	(1) Service Oriented Computing (2) Network Computing (3) Multiagent System (4) Social Network intersection of database, natural language processing and artificial intelligence
Mail sent	Cao Jian	Theoretical Computer Science
Mail sent	Zhu Qili Kenny	Parallel and Distributed Computing
Mail sent	Fu Hongfei	Parallel and Distributed Computing
Mail sent	Tang Feilong	Parallel and Distributed Computing
Mail sent	Li Jie	Parallel and Distributed Computing
Mail sent	Wang Xinbing	Parallel and Distributed Computing
Mail sent	Yao Bin	large scale database management and cloud computing

		Data Storage Systems (in Computer Architecture and Operating System Area) -----Storage Cache -----Reliable Storage Systems -----Non-Volatile Memory Technologies -----Storage Management in File Systems
Mail sent	Wu Chentao	Data Engineering, Database Management, Wireless Network, and Optimization Algorithms Wireless Networking and Mobile Computing Cloud Computing Economic Incentives for Cooperation Privacy Preservation Peer-to-Peer Computing Algorithmic Game Theory
Mail sent	Gao Xiaofeng(female)	next generation wireless communication, protocols and heterogeneous networks; distributed systems, multicast and anycast QoS routing protocols Parallel and distributed processing, Parallelizing compilers, Pervasive Computing, Software engineering, Embedded systems, and Green Computing
Mail sent	Wu Fan	virtual machine;
Mail sent	Jia Weijia	Parallel and Distributed Computing Concurrency Theory, in particular process calculi and Petri nets; Membrane computing; Systems biology, especially formal models for biological systems;
Mail sent	Guo Minyi	Formal methods
Mail sent	Guan Haibing	Theoretical Computer Science
Mail sent	Chen Guihai	theory and its semantics, Theory of Interaction founded on Thesis of Interaction and (ii) decidability and complexity issues in verification
Mail sent	Dong Xiaoju(female)	
Mail sent	Chen Yuting	
Mail sent	Fu Yuxi Professor	

## Nanchang University

## Northeast Normal University(Computer S

Mail sent	Gao Ting(female)- Mail sent	Intelligent Computing, Chemo metrics, Pattern Recognition
Mail sent	Hu Lihong(female)- Mail sent	Interdisciplinary of Computer Science and Chemistry
Mail sent	Liu Shuhua(female)-Mail sent	Intelligent control, mobile robot
	Sun	
Mail sent	Junxi- Mail Sent	Image processing;Pattern recognition
	Yang	
Mail sent	Xiquan-Mail Sent	DM(data mining)、 Semantic Web and Ontology
Mail sent	Zhou Zhiguo-Mail Sent	Security of computer network、 Research on algorithm

Mail sent	Zhu Tieying(female)-Mail Sent	Computer Network, Network Security
mail sent	Sun Tieli	Information Mining and Machine Learning
mail sent	Chen Xiaohui(female)	Educational Technology Theory
mail sent	Teng Guangqing	Internet Information Resource Management
mail sent	Yin Minghao	Artificial Intelligence
mail sent	Yuan Lei	Modern Educational Technology
mail sent	Zhang Bangzuo	Big Data Search and Recommended
mail sent	Zhang Jingbo	Digital Image Processing, Computer Teaching
mail sent	Han Yi	Artificial Intelligence and Planning Identification
mail sent	Li Yongli	Computer System Structure
mail sent	Pudong	Intelligent Control and Embedded Systems, Pattern Recognition, Internet of Things
mail sent	Sun Hongguang	Intelligent Information Processing, Data Mining
mail sent	Wei	Basic Theory of Library Science
mail sent	Li Hui	Computer Network, Image Processing
mail sent	Zhang Libiao	Computing Intelligence, Pattern Recognition, Internet of Things Technology
mail sent	Xu wide	Electronic Information Resources Organization
mail sent	Wang Hui	Information Consulting and Information Industry
mail sent	Wang Dongyan	Business Information Research
mail sent	Xu Yue right	Information Management, Basic Theory of Informatics
mail sent	Peng Li	Basic Theory of Library Science
mail sent	Yang Xiquan	leapfrog teaching
mail sent	Sun Tieli	Computer Network, Distance Education
mail sent	Sun Chengjiang	information Mining and Machine Learning
mail sent	Zhou Dong Dai	Library and Information Science
mail sent	Solution moon(female)	Digital Learning Support Technology
mail sent	Wang Wenyong	Information Technology Courses and Teaching
mail sent	Zheng Xiaojuan	Artificial Intelligence
mail sent	Jiang Hua	Software Automation
mail sent	Han Feng	Data mining
		Computer Education
		Big Data Visualization, Scientific Visualization, Information Visualization, Visual Analysis, Multi-resolution Modeling, Computer Graphics
mail sent	Zhang Hui Jie	Database Technology
mail sent	Li Yan Ling(female)	Information Resource Management, Digital Library
mail sent	Wang Cuiping(female)	
mail sent	Ma Zhiqiang	Image Processing, Software Engineering
mail sent	Kong Jun	Machine Learning, Big Data Analysis, Deep Learning
mail sent	Lv Yinghua	Simulation, digital image processing, pattern recognition for parallel objects Computer

Northwestern Polytechnical University(Compu

		Research areas include but not limit to computational and systems biology, genomic and proteomic data analysis, disease gene identification, protein complex identification, dynamic network analysis, gene methylation data analysis etc

## Northeastern University(Computer sci

Mail sent	Gao Fuxiang	embedded network technology, network and information security research
muYI srne	Yao Yu	network security, malware, nonlinear dynamic system analysis.
Mail sent	Cao Chunhong(female)	computer graphics, computer-aided design, image processing
mail sent	Guo Jun	Complex software systems for reliability engineering and performance optimization, including <ul style="list-style-type: none"> <li>■ Performance modeling, evaluation and optimization</li> <li>■ Reliability modeling and analysis</li> <li>■ System energy saving</li> <li>■ Fault tolerance calculation</li> </ul> digital identity management, privacy protection of social networks, based on the activities of social networks, virtual reality
Mail sent	Guo Nan(female)	cloud computing and service computing
Mail sent	Yang Lei	wireless sensor networks, wireless Mesh network, broadband wireless communications, cognitive radio and other aspects of research work
Mail sent	Jia Jie(female)	computer vision, pattern recognition, medical signal processing and other direction of the study
Mail sent	Wang Lu(female)	distributed data management and query optimization, Web data management and perceptual data management
Mail sent	Zhao Zhibin	

Mail sent	Wang Lihang(female)	application of RFID technology and background data processing, information mining and management. The areas covered include: artificial intelligence, data mining, decision support systems, supply chain management, optimization and other directions ata mining and knowledge discovery, social network data analysis, cloud computing, intelligent information processing, recommendation systems, software engineering
Mail sent	Yin Ying(female)	service computing, cloud computing, mainly for the adaptive environment in the cloud environment, cloud-oriented SLA-oriented cloud service system adaptive, service-based software system (SBS ) Performance self-optimization, dynamic service selection cloud resource optimization management, intelligent optimization, constraint procedures, data mining and other research directions
Mail sent	High Rock	mainly concerned with the next generation of networked software, distributed computing, data mining, complex network analysis and other research directions.
Mail sent	Zhang Changsheng	Mainly engaged in intelligent data and knowledge engineering, database and semantic Web research service calculation, cloud computing, large data analysis, search search, intelligent algorithms.
Mail sent	Zhang Xizhe	Mainly engaged in intelligent information processing, satellite integrated information network, intelligent network management, Ad hoc networks, CTI technology research.
Mail sent	Zhang Fu	cloud computing technology, P2P data management technology, uncertain data management technology data management, data management, time and space data management and location services, distributed computing and large data analysis
Mail sent	Zhang Bin	temporal data mining, machine learning, artificial intelligence, parallel computing language analysis and machine translation of basic research work
Mail sent	Zhao Linliang	data flow analysis and mining, time and space data management technology
Mail sent	Joe	Engaged in Web resource search, resource integration, entity identification, social media and other aspects of research work
Mail sent	Valley Valley	
Mail sent	Lin Shuguan	
Mail sent	Zhu Jingbo	
Mail sent	Zhang Tiancheng	
Mail sent	Kou Yue	

Mail sent	Nie Tiezheng	mass data integration, data quality management, XML data management technology, Web data management, distribution, data management, data distribution, data management, data distribution and data quality discrete mathematics, compilation methods, information retrieval, natural language understanding, text processing and machine translation and other aspects of teaching and research work
Mail sent	Hu Minghan(female)	artificial intelligence, intelligent technology and application, computer network and information technology, automatic reasoning and search
Mail sent	Zhang Wei	computer software and database systems research and teaching work. In recent years, presided over the completion of the distribution and parallel object database system theory and technology, for large industrial enterprises data warehouse and data mining technology to support enterprise dynamic alliance information service technology, complex application for distributed workflow management technology, support High-quality E-Service personalized recommendation technology to support the advanced manufacturing industry, embedded real-time software technology, database theory and technology, data quality analysis, data privacy protection, wireless sensor network data management
Mail sent	Yu Ge	currently chairing the "social media mining, search and recommendation" in the National Natural Science Fund project, participate in "multi-modal data mining" business intelligence, data mining, data-intensive computing, large data management. (NSFC) 1, participated in the completion of the national 863 project, NSFC project, NSFC key project sub-projects and a number of enterprise cooperation projects
Mail sent	Yang Xiaochun	cloud computing, large data management, uncertainty data management, distributed data management, data analysis
Mail sent	Wang Dailing(female)	embedded systems, image processing, real-time data processing, and focus on applied research
Mail sent	Bao Yubin	database theory and technology, data quality analysis, distributed data management
Mail sent	Sun Yongjiao	data mining, large data analysis, data flow management, uncertain data management
Mail sent	Wang Jian	intelligent information processing, search engine, memory database, large data, embedded systems
Mail sent	Wang Bin	
Mail sent	Han Donghong	
Mail sent	Liu Huilin	

Mail sent	Bi Yuanguo	car networking, software definition networks, wireless self-organizing networks, wireless sensor networks, embedded systems
Mail sent	Zhao Hai	not mentioned in profile
Mail sent	Zhao Yuhai	large data mining and knowledge discovery, machine learning, social network data analysis, recommendation system
Mail sent	Yuan Ye	cloud computing, large data management (including graph data management, uncertain data management, data privacy protection), P2P computing super-minicomputer system design , Network switching equipment design, embedded control system design and research and development work. Currently the main research direction for the computer system structure, computer network, embedded control system, complex
Mail sent	Xu Juijiang	network, Internet of things large data, cloud computing, location-based services, data flow management system, publish / subscribe system, mobile database, space-time database, high-dimensional index
Mail sent	Wang Bo - tao	software architecture, distributed parallel computing and operating system technology
Mail sent	Qiao Jianzhong	

southeast uni

## Shandong university of scie

mail send	Cai Xun(female)	Image/Video Recognition,Machine Learning, Digital Signal Processing, information retrieval .
mail sent	Rongjiang Pan	3D shape modelling and analysis, computer graphics and vision, image processing.
mail sent	Pan Li (female)	Cloud computing, Cloud Manufacturing, Market-oriented Resource Allocation
mail sent	Xiangxu Meng	Human Computer Interaction & Virtual Reality CAD & Graphics Data Visualization Web information retrieval and mining, recommendation systems, social network and Web image annotation and retrieval
mail sent	Ma Jun	
mail sent	Junfeng Luan	Intelligent Algorithm and Software ; Computability Logic Computer Graphics
mail sent	Lu Lin(female)	Data Visualization
mail sent	Yilong Yin	Machine Learning,Data Mining, Computational Medicine, and Biometrics.
mail sent	Huazhong Zhang	Computer Network, Distributed System and Mobile Computing, Wireless Sensor Network

mail sent	Zhang Peng	approximation algorithms, randomized algorithms and combinatorial optimization, information networks, and web graphs.
mail sent	Yuanfeng Zhou	Geometric Modeling, Computer Aided Geometry Design, Medical Image Processing, Information Visualization image and video processing and computer vision, interactive image and video segmentation&matting, online video segmentation and video composite.
mail sent	Zhong Fan	Software Architecture and Business Process
mail sent	zheng yong qing	Computational Intelligence, web technology, mobile commerce.
mail sent	ZhaoHeji	Large-scale data management
mail sent	Shidong Zhang	wireless sensor network, Internet of things, trusted computing, embedded system and FPGA/CPLD application development, etc.
mail sent	ZHANG Ruihua	
mail sent	Daming Zhu	Bioinformatics. Designing approximation algorithms and discussing the complexity of some typical problems. Virtual Reality and applications,
mail sent	Xiang Hui	Human Computer Interaction, Digital Home, Intelligent Multimedia Information Processing
mail sent	Wu Lei (female)	Service computing, manufacturing cloud, cloud computing
mail sent	Yafang Wang (female)	Knowledge Harvesting, Information Extraction, Named Entity Disambiguation, Data Mining, Distributed Systems
mail sent	Xinjun Wang	Database, Software engineering, Web data integration and intelligent data analysis
mail sent	Wei Wang	cryptanalysis of cryptologic algorithms, evaluate the security level, and explore new ideas to design algorithm
mail sent	Hua Wang	Virtual Overlay Cloud Networking, Green Network theory and Algorithms, Network Optimization and Swarm Intelligent network, future router and communication technology, Network attack and defense, p2p and Overlay Network
mail sent	Fengyu Wang	Network Security;
mail sent		Network Data Analysis
mail sent	Changhe Tu	computer graphics, digital geometry processing and computer aided geometric design, 3D geometry modeling or processing from point cloud or image, and 3D printing.
mail sent	Yuqing Sun(female)	access control model and technology; security policy; security in web services; workflow management; trust management; privacy and integrity

mail sent	YuLiang Shi	Service computing; Big data management; Business process management; Privacy Preservation
mail sent	SunMing	Data integration and analysis Machine Learning and Applications
mail sent	Gongping Yang	Biometrics
mail sent	Qing Yao(female)	E-commerce, business intelligence, enterprise application integration, business process management
mail sent	Yang Liu(female)	Data Mining, Web Information Retrieval and Analysis, Business Intelligence, Data Warehouse and Mining
mail sent	Weiguo Liu	heterogeneous high performance computing; big data processing; intelligent computing; machine learning. Human Computer Interaction
mail sent	Chenglei Yang	Virtual Reality,
mail sent	Zhongmin Yan	Web data integration, Database machine learning, information retrieval, computer vision, data mining, intelligent computing, bioinformatics
mail sent	Xinshun Xu	Virtual reality and Human computer interaction
mail sent	Yanning Xu	3D modeling and rendering Virtual Reality and applications, Human Computer Interaction, Digital Home, Intelligent Multimedia Information Processing
mail sent	Xiang Hui	Business Process Management and Large scale data management
mail sent	Li Hui	embedded System research, optimization of Wireless sensor network.
mail sent	Li Feng	Cloud computing and database
mail sent	Lanju Kong(female)	Design, analysis, and optimization of embedded and real-time systems.
mail sent	Ju Lei	algorithm design and analysis
	Haitao Jiang	non-volatile storage, embedded systems, distributed control networks, real-time systems
mail sent	Zhiping Jia	AI, Intelligent algorithm, Distributed Computing.
mail sent	Hongze Qiu	Digital Image Processing Image Processing and Analysis
mail sent	Xueying Qin(female)	Computer Vision and Image Analysis
mail sent	Zhaohui Peng	database, data mining research and development Network Security, Software Security, Web Security, Mobile Security, and Software Testing
mail sent	Shanqing Guo	
mail sent	Fenghua Guo	computer graphics, image processing XML query optimization,
mail sent	Guoqing Dong	Community cloud computing Reconfigurable System and Its Application
		Codition Monitoring and Fault Diagnosis System
mail sent	Yibin Li	Lidar System and Its Application

mail sent	Xuemei Li(female)	computer graphics Software Engineering. Visual Analytics. Human Computer Interaction. Picture Processing.
mail sent	Xueqing Li	Real-time Scheduling, Embedded System, None Volatile Memory
mail sent	Li Xin	Recent research interests: Computer Network Modeling Network Performance and Optimization
mail sent	Linda(female)	Green Networking, Energy Efficient Scheme
mail sent	Qingzhong Li	large-scale network data management , web data integration and intelligent data analysis Computer Network Performance and Security,Sofeware Defined Networks, Traffic Engineering, and QoS Evaluation
mail sent	Chris	Bioinformatics; Chinese information processing; discrete algorithms
mail sent	Haodi Feng(Female)	Parallel and High Performance Computing
mail sent	Gong Bin	Visualization
mail sent	he wei	service computing, workflow technology and business process management.
mail sent	Xiaoguang Hong	Web data integration and intelligent data analysis Reliability of the Computer Architecture; Modelling of Cyber-Physical System
mail sent	Hongjun Dai	
mail sent	Mengbo Hou	Applied cryptography and network information Security,
mail sent	Chengyu Hu	Information Security and Cryptography, Big Data Processing and Mining Information Retrieval Health Computing
mail sent	Zhumin Chen	Social Computing 1. BigData management and big data analytics 2. Big Data artificial intelligence 3. Service computing and Collaborative computing 4. Software architecture and technology in cloud

## Tianjin University

Shiguang Liu	Image/video processing, Virtual reality
Bruce Denby	image processing applications, Silent Speech Interfaces
Kun Li(F)	Intrinsic image decomposition from a single RGB-D image with sparse and non-local priors
MATEU SBERT	Medical Imaging, Image Processing , Shape Recognition , Synthesis of Photo-realistic Images in Computer Games and Virtual Reality Systems, Improvement and application of virtual reality games technology and web content.

## University of Electronic Science and Technology of China

Xu Chunxiang(female)	Cryptography, Information security
CAI Shimin	Computer network and communication; network and system security; cloud computing and big data processing
CHEN, Aiguo	Cloud Computing, Computer and Network Security, Software Security
Juan Chen(female)	Computer Vision, Data Mining, Biomedical Imaging, Pattern Recognition, Machine Learning
Daunbing Chen	Data mining, Information physics, Complex network, Spreading and recommending
CHEN Leiting	Computer Graphics, Digital Image Processing, Virtual Reality, Digital Media Technology
Ding Xuyang	Computer Networks, Information Security, Embedded Systems
Le Dong	Digital Media Technology, Pattern Recognition and Intelligent Robot, Cloud Computing
Hancong Duan	Big Data Processing, Distributed Storage, Pattern Recognition, Multimedia Content Distribution Network
Mingyu Fan(female)	Pattern Recognition, Cryptography, Security Protocol, Network Application
Bo Fu	Pattern Recognition, Machine Learning, Biometrics, Cryptography, Image Processing and Analysis
Hui Gao	Data Mining, Formal verification, Image Processing and Analysis
Gong Haigang	Computer Network and Communication, Cloud Computing and Big Data
Hou Mengshu	P2P Computing, Wireless Sensor Network, Distributed Storage Systems
Lisheng Huang	Network measurement / management, OSS, network security.
Li Fagen	Cryptography and Network Security
Hongwei Li	Applied Cryptography, Security Protocol
Li Yujun	P2P Computing, Wireless Sensor Network

liaoyongjian	Cryptographic scheme designing and network security protocol analysising Pattern Recognition, Artificial Intelligence, Face Recognition, Speech Recognition, Image, Video and Speech Processing and Analysis, Big data knowledge discovery
Lin Jie	Data mining, statistacal learning and analysis modeling
Liu, Zhen	Graphics, Image Processing, Network Computing
Guanghui Lu	Wireless application and system security, including Radio Frequency Identification Techonlogy, Wireless network, Mobile computing and Network Security.
Li Lu	Cloud Computing; Computer Networks and Communication Technology; Middleware Technology
Guangchun LUO	Mobile Computing, Cloud Computing, Data Mining
Xinzheng Niu	Computation Theory, Machine Learning and Pattern Recognition, Cloud computing and Big data
QIN, KE	Digital Media, Computer Graphics, Virtual Reality, Visual Simulation, Computer Network
Qiu Hang	Neural Networks, Deep Learning, Spiking Coding, NP Problems, Path Problems
Qu Hong	
Zhihai Rong	Complex networks, Game theory, Evolutionary dynamics
Mingsheng Shang	Data Mining, Social Networks/Graph Analysis, Recommender Systems
Jie Shen	Mobile Multimedia Computing, Mobile Payment, Video Codec, Augmented Reality
Guolin SUN	Software Defined Wireless Network and Information Processing(Big Data)
Quan Wen	Data Mining, Computer Vision, Biomedical Image Informatics, Pattern Recognition
Ming Sun	Semantic Web, Data Mining, Distributed Computing, Middleware
Qi Xia(female)	Network Information Security, Cryptography, Colud Computing, Security Protocol
Xiang Yu	Computer network, Wireless Sensor Network, Determined Ethernet, Embedded System
Yan Hua	Computing Intelligence, Big Data
Xiuqin Zhong(female)	Automated reasoning, Ontology, Cognitive Model
Shenglin Gui	Information Security, Embedded System, Big Data
wu lijun	Information Security and Artificial Intelligence
Song Chao	Internet of Things, Cloud computing, Big data
	Theory of Computation; artificial intelligence and Pattern recognition; Computer graphics and image processing; Cloud computing and big data processing; Digital Media Technology.
Xu Zenglin	Computer networks and comuniction, Data analysis
Luo Jiaqing	Computer networks and comunication, Data analysis

Xu Zenglin	Theory of Computation; artificial intelligence and Pattern recognition; Computer graphics and image processing; Cloud computing and big data processing; Digital Media Technology.
SHAO Jie	Machine Intelligence and Pattern Recognition, Digital Media Technology, Cloud Computing and Big Data Processing
Yong WANG	P2P network measurements & modeling, Mobil network privacy preserving
Bo YANG	Cloud/Grid Computing, Data Mining, Software and System Reliability
shijie zhou	Distributed computing, Intellitent Trasporation, Network Security, RFID, Big data
JUNLIN ZHOU	Data Mining, Recommender System, Big data Processing and Analysis, Social network analysis
Yong Zhao	Cloud computing, Big data, Resource management, Task scheduling, Cloud workflow
Siyu Zhan	computer networks, web Intelligence, embedded systems
Yong Yu	Public Cryptography, Digital Signature, Public Encryption, Cloud Security
Haomiao Yang	Public-key Cryptography, Security in Cloud Computing, Security in Big Data
Yang,Guowu	formal verification, logic synthesis in quantum computing and non-linear control theory
HONG WU	Image Analysis and Retrieval, Computer Vision, Machine Learning, Text Retrieval
Yang Xu	Multi-agent and Robotics System, Distributed Artifical Intelligent, Semantic Web, Mobile sensor network

mail sent	He Kun(female)	data mining and machine learning computer application. Including data security, trusted computing, big data analysis
mail sent	Xiang Wen	Complex System Modeling and Optimization, Artificial Intelligence Applications, Intelligent Decision Making, Big Data Analytics, Scheduling and Planning, NP-Hard Problem Solving, Heuristic Optimization
mail sent	Lv Zhipeng	

mail sent	Li Guohui	Modern data management theory and technology, including data mining, spatial data management, data flow processing, web data processing and big data processing; real-time computing, including real-time operating system, real-time task scheduling, real-time task scheduling
mail sent	Cao Zhongsheng	Modern Database Theory and Technology
mail sent	Yang Tianruo	parallel and distributed computing, embedded and pervasive computing, and big data

## Jiangsu university(Compu)

Shiguang Ju	Information Security, Trusted Systems, Visual Spatial DBMS, Data Mining.
Shengli Wu	Data base and information systems, information retrieval, machine learning, Web technology
Changda Wang	Information security, Model Checking, E-learning
Fei Han	Pattern Recognition, Swarm Intelligence, Intelligent Information Processing
Yuquan Zhu	Data Mining, Complex Information System Integration, KDD, database systems & its application
Tiejun Xiao	Embedded Computing & System
Yisong Liu	Distributed Virtual Environment, Intelligent Virtual Agents, Reasoning about Action, Spatio-temporal Reasoning, Semantic Web
Bao Kejin	Research interests include embedded system application, intelligent control,
Xinsheng Wang	Wireless Sensor Network, Database Technology
Jiming Chen	Distributed System, Network
Lanling Zeng(female)	Computer Graphics
Yi Zhu	Research interests include Information Centric Network, Content Centric Network and UAV(Unmanned Aerial Vehicle) Development
Nianqiang Zhao	Embedded System
Conghua Zhou	Model Checking, Multi-agents, Secure Operating System, Modal Logic, Access Control
Li Li(female)	1) Fuzzy Fault Detection and Diagnosis; 2) Simulation and Intelligent Control; 3) Intelligent Algorithm and Optimization
XiaoLong Zhu	Include Coding Theory, Software System Framework, Large-scale Information system.

Zhiwen Zou	Research interests include Database Theory, distributed system , information security and virtual reality.
Bi Jianliang	Machine learning
Xie Jun	Rough Set Theory and Application
Kunqi Guo	Wireless Communication and Mobile Computing.
Tao Cai	Cloud Storage, operating system, artificial intelligence Research interests include Formal Methods and their applications in Software Security and Reliability, Program Analysis and Attack, Intrusion Detection, Database Security and Privacy
Weihe Chen	Database theory and application,Data Mining,SCADA
Wenhui Nie	Video Processing, Embedded Computing
Feng Li	
Xingyi Li	include Intelligent Transportation Systems, Intelligent Data Processing and Decision Support, Police Information Systems, Emergency Response Command Systems
Hongjin Wang(female)	Research interests include Signal Processing, Wireless communication technology, RFID, bluetooth tenology
Qian Zhu(female)	Digital Image Processing, Natural Language Processing
Xuehua Song(female)	Communications and embedded software design, Automotive electronic, Distributed Control System
Chen Zu Jue	Embedded computing and Embedded system、Wireless sensor networks、Intelligent Instruments、the key technology and basic theory in Remote wireless video monitor technology and the research and development for products
Huaji Shi	Modern Data Mining, Information Retrieval and Web Mining, Information System
Anrong Xue	Research interests include data mining, machine learning, spatial database theory and technology, geographic information system, multimedia technology.
Yan Li	Computer Application, Software Engineering
Hebiao Yang	Research interests include Software Engineering, Software Architecture, Data Mining, Information System , Technique & Application of Database.
Yuehua Zhao	Research interests include Information Theory and security Technology, Communication security, Secure Embedded System.and its Application
Lianying Zhou(female)	Research interests include Network Security, Network Performance, Wireless Network, Electronic Commerce, Internet of Things
Na Zhu (female)	Research interests include All Optical Networks, Network Optimization, Optical Access Networks, Wireless Optical Communication, and Wireless Sensor Networks.

	Jianming Zhang	Image Processing, Pattern Recognition, System Simulation, Virtual Reality
	Fang Yuntuan	Design of new photonic device; Applications of metamaterial in optical circuit
	Qing Lin	Research interests include Pattern Recognition and Intelligent System, Data Mining, Image Recognition, Face Recognition, Emotion Recognition, Computer Application Technology, DataBase & DataWarehouse, Decision Support.
	Yongzhao Zhan	Human Computer Interaction, Distributed Computing
	Yuqing Song	Medical Image Processing, Data Mining, Pattern Recognition, Computer Application in Medicine
	Shu Yan(female)	Mobile Communication & Wireless Technology and Electromagnetic field & Microwave technology, with emphasis on Wireless Sensor Network, Antenna and Computational Electromagnetics
	Qirong Mao(female)	Multimedia Processing, Big data on Multimedia, Human-Computer Interaction
	Lixia Yang	Electromagnetic Scattering of Complex Objects, Computational Electromagnetics, Electromagnetic Characteristics of Complex Media, Microwave Plasma Electromagnetics, RF Microwave Circuits Design, and Antenna Theory and Design in Wireless Communication System
	Jinfu Chen	software testing, trusted software and information security
	Liangmin Wang	Wireless Networks Security, Security and Privacy of Big Data
	Keyang Cheng	Pattern Recognition, Computer Vision, Machine Learning, Image Processing
